

Questions for Interview with IConsultancy

1. Are there any specific outcomes you consider the most critical for success?
2. Do you have any existing resources or research that could help guide our work? Do you
3. Do you want us to look at future job trends, or should we focus primarily on current demand?
4. Are there any metrics or success criteria you will use to evaluate our work?
5. How frequently would you like updates or check-ins on project progress?
6. What is the preferred method for ongoing communication (email, meetings, shared documents, etc.)?
7. Who should we contact for approvals and feedback?
8. Is our research into job skills in the iSchool going to be static? Should we be making plans around the potential that the skills required and those developed will shift over time?
9. Are created deliverables going to be distributed through the iConsultancy or the iSchool itself?
10. I know the iConsultancy is disconnected from the university, but do you think anything we find regarding job skills might be used to inform or reevaluate iSchool curriculum?
11. How should we address any potential discrepancies between skills learned and skills sought after?
12. For research into the skills the iSchool teaches, should we consider skills necessary for positions former students currently work at or should we primarily focus on skills explicitly taught here?
